SHEET INSTRUCTIONS

Step 1. Go to the Index page and enter your multiplier for each product type in the yellow cells in the Multiplier column.

The gray cells will populate for you. You will only be able to enter information in the Multiplier column on the Index page.

note: This will calculate your net prices in the corresponding price pages.

note: Your multipliers are found on your discount multiplier sheet, or have been entered for you by one of our sales staff, if you do not have a copy of your discount multiplier sheet please contact us at (952) 491-0368 or via email.

Step 2. Click the blue page number cell in the Page column on the Index page to view the corresponding page.

You can also access the pages by clicking on the colored tabs at the bottom of the sheet.

Step 3. Click the cell in the Web link column to access cut sheets and brochures for the corresponding

product type. Where the PDF logo is present there are also links to cutsheets and brochures on the product pages.

Security Settings: If you receive security alert regarding Macros. Go to Tools menu, select Macros, then Security. Under the Security tab, set the security to Medium, then under the Trusted Publishers tab check the two boxes at the bottom of the window.

ORDER POLICY

1. Please send orders via fax, e-mail, or mail to Environmental Products of MN.. Written orders are preferred for clarification purposes, but telephone orders will be accepted on an emergency basis. An order acknowledgement will be faxed after it is processed. Please check your acknowledgement for any errors and notify Customer Service **Immediately** if any discrepancies exist. If you fail to receive an order acknowledgement within 2 days of sending your purchase order, please notify Customer Service **Immediately**.
2. Orders will be produced in accordance with current production schedule. Estimated ship date will be shown on order acknowledgement. Any orders that are received after 2:00 p.m. CST will be entered the next business day.
3. Rush orders will be handled in the following manner:
 - A. Same day shipment – **Stock inventory only**. Order must be received no later than 11:00 a.m. CST for same day shipment. **An expedite fee of \$50.00 per item for same day shipment will be applicable.**
 - B. Next day shipment – **Stock inventory only**. Order must be received by 12:00 Noon CST on day before shipment **An expedite fee of \$20.00 per item for next day shipment will be applicable.**
 - C. Items that are not stock items or currently out of stock must be scheduled; customer will be advised on individual basis.
4. Order changes will be handled in the following manner:
 - A. Add-on orders will be accepted against original purchase order for a period of only **3 working days after the initial order is received**. There will be no add-ons after this period. If customer wishes to use their same purchase order number after three-day period, a different internal sales order number will be assigned and every effort will be made to ship with original order **if feasible**.
 - B. Other changes – Other order changes must be made within 24 hours of submitting orders. Please check your order acknowledgement for accuracy.
5. Blanket orders or schedule of releases - Blanket purchase orders may have add-on releases up until the last blanket purchase order release date.
6. Shipment of orders:
 - A. The policy of consolidating two or more orders will be adhered to when feasible. When FOB Factory, best method of shipment will be used unless otherwise specified. If FOB Destination, it will be at our discretion which method of shipment is utilized.
 - B. Freight – When shipment is made on a FOB Factory basis, Title of Goods passes to Consignee when Carrier's Agent signs the Bill of Lading. All responsibility for claims due to loss or damage will rest with consignee at time of receipt; all goods should be carefully counted and inspected for damages and discrepancies. The Carrier's freight bill must be properly noted in the event of loss or damage. All claims for loss or damage should be filed promptly with Carrier. In the event concealed damage is noted after receipt of goods, carrier must be notified immediately in writing and by telephone requesting an inspection of the goods in order that proper liability may be established and appropriate claim filed. Such requests must be made within 15 days of delivery date.
 - C. Replacement orders – If a return of products is required, contact Environmental Products of MN Inc. Customer Service for a Return Authorization.
 - D. Drop Shipments – Environmental Products of MN Inc. will ship directly to your customers if requested.
 - E. Customer pick-ups – EnvProducts will hold orders at dock for a period of 10 working days for customer pick-ups. If an order is past 10 working days and the customer has not picked up order or approved shipment of order after notification attempts, the order will be shipped to the customer "Best Way", Freight Collect or will be restocked.
7. Packaging – All products are packaged in standard quantities per carton as specified on product price sheets. Shipments will be made in multiples of these quantities. A service charge will be added when requesting non-standard labeling, etc.
8. Minimum orders – A minimum order of \$50.00 is **required**. Orders of less than \$50.00 will be billed at the minimum or accessed an order fulfillment fee.
9. Prices are subject to change without notice. Orders received or shipped on or after date of change will be at the revised price.
10. Terms of Payment – as per invoice. Standard terms are net 30 days, unless otherwise noted per invoice. Payments may be made in the form of check or credit card. Any account having an unpaid invoice 15 days past due will be placed on hold and shipment of future orders held until account is made current. Accounts with a balance of 45 days and older will be subject to a 1.5% per month (18% annual) interest charge on the unpaid balance.
11. **Remittance Address:**
Environmental Products. Of MN. Inc.
6223 Halifax Ave. S.
Minneapolis MN. 55424
12. Samples – Most samples are available at no charge, however, certain requests may require a nominal charge.
13. Literature requests – Please send a written request to customer service for any brochures or catalogs that are needed. Please include the appropriate shipping address on request. Literature will be sent out promptly.
14. Special stocking requests – If special, non-stock items are required for EnvProducts to stock for your facility and these items are specifically ordered for your company, a Purchase Buy-Out Agreement is required. Please call for Purchase Buy-Out Agreement and approval.
15. Order cancellations – An applicable fee may be charged if order is cancelled (other time frame 24 hrs prior to ship etc).

STANDARD CONDITIONS OF SALE

1. All prices in this Environmental Products of MN Inc. (ENV) pricing guide are List, FOB Factory.
2. All items must be ordered in standard published case quantities.
3. A pallet charge will apply when a pallet is required.
4. ENV reserves the right to ship products at the price prevailing at the time of shipment.
5. Orders submitted less than \$50.00, not to include freight charges, will be assessed an order fulfillment fee.
6. A 20% re-stocking fee will apply for returned items after inspection and acceptance by ENV. Returns must be pre-approved. Non-standard size products may not be returned for credit.
7. Packaging – All standard products are packaged in standard quantities per carton as specified on product price sheets. Nonstandard products are packaged at ENV's discretion, due to size variations. A service charge will be added when requesting special labeling or packaging.
8. Terms of sale are specified on the face of the invoice and/or acknowledgement.
9. All orders are subject to acceptance by ENV corporate office.
10. Any applicable state inspection fee, federal, state or other governmental severance, processing, manufacturing or sales tax will be charged to and paid by the Purchaser.
11. ENV shall not be liable for any delay or failure to deliver any or all of the goods by reason of labor disputes, strikes, war, riots, insurrection, civil commotion, fire, flood, weather conditions, fog governmental regulations or any other governmental action (legislative, executive, judicial or administrative), shortage of cars, trucks or barges or delays in transit, inability of ENV to procure any of the materials, entering into , or inability to use any of its suitable equipment used in , the manufacture of the goods specified in this order, by reason of governmental priorities or other governmental action and/or for any reason which may affect the procurement by ENV of such materials or the use of such equipment, and any other contingencies of manufacture or shipment, whether or not of a class or kind mentioned herein and not reasonably within ENV control.
12. All claims on account of quantity or quality must be made in writing within 15 days after receipt of goods.
13. All shipments will be shipped PREPAID at ENV's discretion and added to Purchaser's invoice, unless otherwise specified on Purchaser's written purchase order and acknowledged by QFI via order acknowledgement. Any damage claims resulting from a prepaid freight carrier will be the responsibility of ENV only after the Purchaser forwards to ENV the necessary documents notating the damage and/or shortage and signed by the carrier's driver. Without proper notation, replacement and credit requests will be denied. QFI is to be notified of the damage within five (5) days of acceptance of goods by Purchaser. Damage claims resulting from Purchaser's carrier, as 3rd party or Collect, will be the responsibility of the Purchaser. Replacements must be submitted via PO, expecting applicable charges. Credits will not be applicable.
14. Purchaser shall not be entitled to make any claim for shortage or damage when goods are delivered to purchaser's trucks at ENV plant. In these instances, purchaser's truck driver shall sign a receipt for the quantity of goods called for order, acknowledging receipt of the goods in good condition.
15. ENV warrants the goods to be free from defects in material and workmanship under normal use and service for a period of 90 days from the date of the receipt of the goods by the purchaser and any claim by the purchaser with reference to the quality of the goods sold hereunder must be made in writing within said 90 day period. ENV shall not be liable to purchaser or anyone else for consequential damages or for loss, damage or expense directly or indirectly arising from the sale, handling or use of the goods, or from any other cause relating thereto. ENV's obligation under this warranty is limited to the replacement of goods not complying herewith, or, at ENV's election, the repayment of or crediting purchaser with an amount equal to the purchase price of such goods. THIS WARRANTY IS IN LIEU OF AND ENV EXPRESSLY DISCLAIMS ALL OTHER EXPRESSED OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR ANY PURPOSE.
16. Terms of Payment – as per invoice. Standard terms are net 30 days, unless otherwise noted per invoice. Payments may be made in the form of check or credit card. Any account having an unpaid invoice 15 days past due will be placed on hold and shipment of future orders held until account is made current. Accounts with a balance of 45 days and older will be subject to a 1.5% per month (18% annual) interest charge on the unpaid balance.
17. This agreement constitutes the entire contract in respect to the goods described, as accepted and entered upon the books of QFI, and is not subject to purchaser's purchase order and may not be orally modified, amended or discharged in any respect.

STANDARD CAPACITY MERV 8

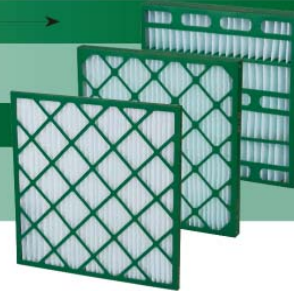

BRUTUS MERV 8 filters from EnvProducts are Born Tough. The expanded metal reinforced media holds steady under heavy dust loading. The moisture proof frame stands strong at up to 46% greater thickness than competing filters. With lower airflow resistance than the competition BRUTUS will take a bite out of energy bills. BRUTUS is the perfect "Service Pleat" or pre-filter to high efficiency filters. It's also a great upgrade to "self supported" pleats and low efficiency fiberglass or polyester filters.

- 1" BRUTUS MERV 8 filters have 14 pleats per linear foot.
- 2" BRUTUS MERV 8 filters have 10 pleats per linear foot.
- 4" BRUTUS MERV 8 filters have 8 pleats per linear foot

DQP40FILTER

HIGH CAPACITY MERV 8

DQP 40 filters are MERV 8 rated according to ASHRAE 52.2 standards. DQP 40 filters are made with synthetic media that is bonded to a rust inhibitor coated expanded metal. The entire inner surface of the 24 point beverage board frame is coated with adhesive to encapsulate the pleated media pack, prevent air bypass, and provide rigidity.

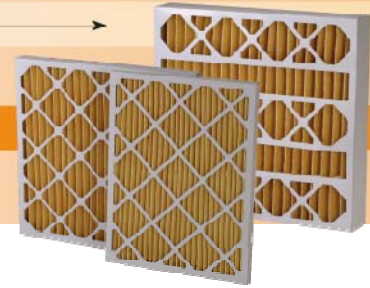

- 1" DQP's have 16 pleats per linear foot.
- 2" DQP's have 15 pleats per linear foot.
- 4" DQP's have 11 pleats per linear foot.

GQPFILTER

MERV 13 GREEN QUALITY PLEATS

GQP "Green" Quality Pleats are ideally suited for the Green Building Council's latest LEED MERV 13 Indoor Air Quality requirements for occupant health. GQP's, as well as our Quality Flow MERV 13 & 14 filters, have the added benefit of low initial cost and don't require any retrofitting to the HVAC system. Ultra Low Pressure drop ensures lower ongoing costs through energy savings. High dust loading prolongs filter life, thus reducing labor and landfill costs.

- 1" GQP's have 18 pleats per linear foot.
- 2" GQP's have 15 pleats per linear foot.
- 4" GQP's have 11 pleats per linear foot.

ODORBAN

CARBON PLEATED PANEL FILTERS

OdorBan filters are MERV 8 rated according to ASHRAE 52.2 standards. OdorBan filters utilize two stage filtration technology to remove odors, irritant gases, particulates and dust in some of the most challenging environments. Odor Ban panel filters fit into existing filter housings so fume and odor control is available without costly retrofitting or expensive housings and fans.

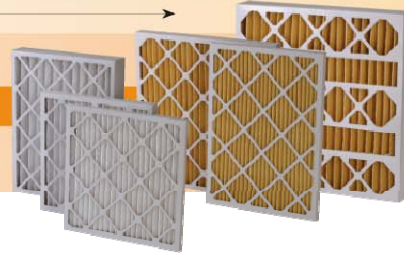

- 1" ODORBAN's have 16 pleats per linear foot.
- 2" ODORBAN's have 15 pleats per linear foot.
- 4" ODORBAN's have 11 pleats per linear foot.

QUALITY PLEATS

NON-STANDARD PLEATED PANEL FILTERS

We can build virtually any custom size filter. We take great care to make our non-standard filters as sturdy and effective as a standard size filter. Our EQP, DQP, MQP, & GQP filters are made with synthetic media that is bonded to a rust inhibitor coated expanded metal. EQP's & DQP's are MERV 8 rated, MQP's are MERV 11 rated, and GQP's are MERV 13 according to ASHRAE 52.2 standards. The entire inner surface of the 24 point beverage board frame is coated with adhesive to encapsulate the pleated media pack, prevent air bypass, and provide rigidity

GRILLEFILTER

ONE YEAR FILTER

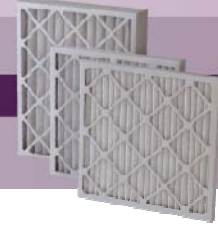

One Year Grille-Filters residential replacement filters are designed to fit existing air-filter grilles. One Year Grille Filters are designed with a 5" filter depth that provides 9 times the media area of a comparable 1" filter, which greatly reduces pressure drop while increasing service life. One Year Grille Filters utilize a unique knife edge seal header to prevent bypass, and can last 6 months to a year in most home installations. One Year Grille Filters are offered in MERV 8, 11, 13 and fume control ratings.

QUALITY INSERTS

TYPE 40 PLEATED

Type 40 Inserts are made with the same media used in our EQP and DQP Pleated Panel Filters. These medias are laminated to a hot dipped galvanized expanded metal and then pleated for increased surface area. Quality Inserts fit into metal holding frames which stay in the filter housing; only the pleated insert is replaced saving cost and disposal space. 50 Quality Inserts fit in the same size shipping container as 12 pleated panel filters. Quality Inserts can be ordered cut to a specific filter size or in a continuous pleated roll.

QUALITY PLEATED INSERTS

* Non-Standard Widths are not available.

* To price non-standard LENGTH inserts, use the price of the next longest insert of the same width.

* If your NS insert is longer than a standard length, use the smallest multiple of :

insert to equal at least the total length of your NS insert. Example: QI401220452 = 2 x's the price of QI401220252

QUALITY INSERTS

TYPE MQP PLEATED

Type MQP Inserts are made with the same media used in our MQP Pleated Panel Filters. These medias are laminated to a hot dipped galvanized expanded metal and then pleated for increased surface area. Quality Inserts fit into metal holding frames which stay in the filter housing; only the pleated insert is replaced saving cost and disposal space. 50 Quality Inserts fit in the same size shipping container as 12 pleated panel filters. Quality Inserts can be ordered cut to a specific filter size or in a continuous pleated roll.

QUALITYFLOW

4" MERV 14, 13 & 11

QualityFlow 4" are designed to handle high airflow and provide low pressure drop. QualityFlow 4" filters utilize a durable frame and media that stand up to turbulence and abrasion that typical medias cannot withstand. QualityFlow 4" filters make great replacements for 4" minipleats, other 4" deep high efficiency filters, 12" deep rigid cells, and 4 and 6 panel V-cells by reducing energy costs, while providing high dust holding and long filter life. QualityFlow 4" are available in MERV 14, 13, and 11 ratings per ASHRAE 52.2. QualityFlow media is also available in the QualityFlow Extreme 6" and 12".

OPTIONS

Add one of the following letters to the end of the part number for options.

Example: QF1424244XP

X = Gaskets on air exit side (back) of header. Add \$4.00 to list price.

E = Gaskets on air entry side (face) of header. Add \$4.00 to list price.

S = Gaskets on horizontal sides of header. Add \$3.00 to list price.

HV = High Velocity 9 gauge wire grid downstream. Add \$4.00 to list price.

HV2 = High Velocity 9 gauge wire grids upstream and downstream. Add \$8.00 to list price.

B = Cross bracing upstream and downstream. Add \$10.00 to list price.

J = Cross bracing downstream. Add \$5.00 to list price.

D = Double Header. Add \$10.00 to list price.

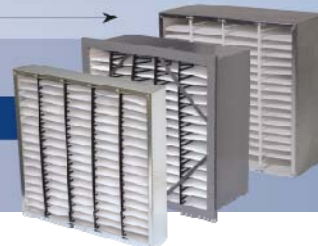

P = Plastic Box Construction. No charge. Call for availability

* To price a non-standard QualityFlow, add \$30 to the list price of the next largest filter. Maximum circumference (Width x's 2 + Height x's 2) is 96".

Maximum depth is 4" actual and minimum depth is 3.5" actual.

QUALITYFLOW EXTREME

DEEP PLEAT RIGID CELL FILTERS

QualityFlow Extreme are designed to handle high airflow and provide low pressure drop. QualityFlow Extreme filters utilize a durable frame and media that stand up to turbulence and abrasion that typical medias cannot withstand. QualityFlow Extreme filters make great replacements for any 6" and 12" deep high efficiency rigid filters, and 8 panel V-cells by reducing energy costs, while providing high dust holding and long filter life. QualityFlow Extreme filters are available in MERV 14 and 13 ratings per ASHRAE 52.2. QualityFlow media is also available in the QualityFlow 4".

 - S = Gaskets on horizontal sides of header. Add \$3.00 to list price.
 - HV = High Velocity 9 gauge wire grid downstream. Add \$4.00 to list price.
 - HV2 = High Velocity 9 gauge wire grids upstream and downstream. Add \$8.00 to list price.
 - B = Cross bracing upstream and downstream. Add \$10.00 to list price.
 - J = Cross bracing downstream. Add \$5.00 to list price.
 - D = Double Header. Add \$10.00 to list price.
 - P = Plastic Box Construction. No charge. Call for availability
- * To price a non-standard QualityFlow Extreme, add \$30 to the list price of the next largest filter. Maximum circumference (Width x's 2 + Height x's 2) is 96". Maximum depth is 11.5" actual and minimum depth is 5" actual.

QUALITYCELL

DEEP PLEAT RIGID CELL FILTER

WITH HEADER

Quality Cell rigid filters are designed to provide consistent high efficiency filtration in variable air volume systems and turbulent air. Deep pleats are held firmly in place with plastic separators and expanded metal backing. Every edge of the media pack is glued inside the periphery of the frame to prevent air and dust bypass. The media and separators are 100% polypropylene to resist moisture damage, microbial growth, and puncture damage. Heavy gauge galvanized enclosure frame resists corrosion and maintains its structural integrity for extended months of service. Quality Cells are excellent replacement filters for ASHRAE style metal separator filters and for mini-pleat V cells.

GASKETING

Add one of the following letters to the end of the part number for gasketing. Example: QP96242422X

X = Gaskets on air exit side (back) of header. Add \$4.00 to list price.

E = Gaskets on air entry side (face) of header. Add \$4.00 to list price.

S = Gaskets on horizontal sides of header. Add \$3.00 to list price.

SUPPORT LOOPS

Add one of the following letters to the end of the part number for support loops. Example: QP96242422T

T = Loop on top of each pocket.

Add \$.80 to list per pocket.

D = Loop on top & bottom of each pocket.

Add \$1.60 to list per pocket.

* To price non-standard bag filters, use the price of the next largest filter of the same pocket depth and pocket count and add \$15 to that list price. To price a non-standard pocket depth is the same as the next longest standard length price.

QUALITYPAK

GASKETING

Add one of the following letters to the end of the part number for gasketing. Example: QP86242422X

X = Gaskets on air exit side (back) of header. Add \$4.00 to list price.

E = Gaskets on air entry side (face) of header. Add \$4.00 to list price.

S = Gaskets on horizontal sides of header. Add \$3.00 to list price.

SUPPORT LOOPS

Add one of the following letters to the end of the part number for support loops. Example: QP88242422T

T = Loop on top of each pocket.

Add \$.80 to list per pocket.

D = Loop on top & bottom of each pocket.

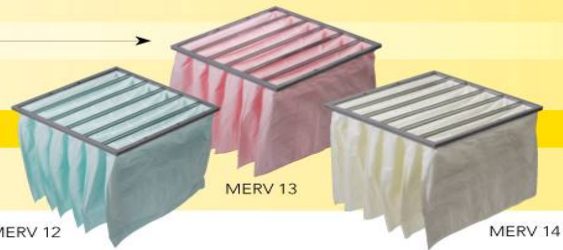

Add \$1.60 to list per pocket.

* To price non-standard bag filters, use the price of the next largest filter of the same pocket depth and pocket count and add \$15 to that list price. To price a non-standard pocket depth is the same as the next longest standard length price.

QUALITYPAK

MULTI-POCKET BAG FILTER

MERV 12 BAG FILTERS

Quality Pak synthetic media bag filters are the most economical solution for high efficiency filtration. They are offered in MERV 14, 13, and 12 ratings. Synthetic media is non-carcinogenic and resistant to abrasion, moisture and microbial growth. The adhesive seal around each pocket and inside the header, give these filters tremendous blow-out resistance. Quality Paks fold for minimal storage, shipping, and disposal space.

GASKETING

Add one of the following letters to the end of the part number for gasketing. Example: QP66242422X

X = Gaskets on air exit side (back) of header. Add \$4.00 to list price.

E = Gaskets on air entry side (face) of header. Add \$4.00 to list price.

S = Gaskets on horizontal sides of header. Add \$3.00 to list price.

SUPPORT LOOPS

Add one of the following letters to the end of the part number for support loops. Example: QP96242422T

T = Loop on top of each pocket.

Add \$.80 to list per pocket.

D = Loop on top & bottom of each pocket.

Add \$1.60 to list per pocket.

* To price non-standard bag filters, use the price of the next largest filter of the same pocket depth and pocket count and add \$15 to that list price. To price a non-standard pocket depth is the same as the next longest standard length price.

Quality Seal Ring Panels are constructed from two layers of 100% synthetic polyester media thermally sealed around a .148" galvanized wire. A support wire and radial bonds in the center of the panel keep the media from sagging and fluttering to prevent dust migration. A one inch overlap of media around the support wire ensures a positive seal and no dust bypass. Each layer of media has multiple fiber deniers (fiber diameter) which graduate from coarse to fine for maximum dust loading and efficiency. A latex resin dry tackifier is added on the downstream side as an added dust migration prevention. AGEIS antimicrobial treatment is also added to RPDx1 and RPDx8 panels to help prevent microbial growth.

RPDX1 PANELS

Air entering layer is 1" antimicrobial tackified poly, air exit layer is 1/2" needled small denier poly. These panels are typically used for air in HVAC dust capture applications for higher indoor air quality.

- * To order non-standard ring panels, add \$2 to the list price of the next largest standard size panel.
- * To order non-standard RPDx1 ring panels with dimensions larger than 25x25, multiply width x's height x's \$.012 = list price.
- * Maximum of 30" for width or height.

RPDX2 PANELS

Air entering layer is 1-1/2" poly, air exit layer is 1/2" needled small denier poly. These panels are typically used for air in HVAC dust capture applications for higher indoor air quality.

- * To order non-standard ring panels, add \$2 to the list price of the next largest standard size panel.
- * To order non-standard RPDx2 ring panels with dimensions larger than 25x25, multiply width x's height x's \$.015 = list price.
- * Maximum of 30" for width or height.

RPDX8 PANELS

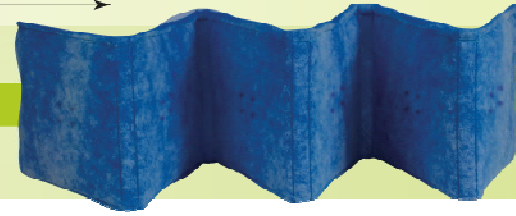

Air entering layer is 1" MERV 8 antimicrobial tackified poly, air exit layer is 1/2" needled small denier poly. These panels are typically used for air in HVAC dust capture applications for higher indoor air quality.

- * To order non-standard ring panels, add \$2 to the list price of the next largest standard size panel.
- * To order non-standard RPDx2 ring panels with dimensions larger than 25x25, multiply width x's height x's \$.015 = list price.
- * Maximum of 30" for width or height.

QUALITYSEAL

POLYESTER RING LINK FILTERS

3-PLY 1" RING LINK

Quality Seal Ring Links are ring panels that are formed in a continuous chain to eliminate bypass between panels. Like Quality Seal Ring Panels, Quality Seal Ring Links are constructed from two layers of 100% synthetic polyester media thermally sealed around a .148" galvanized wire. A support wire and radial bonds in the center of each panel keep the media from sagging and fluttering to prevent dust migration. A one inch overlap of media around the support wire ensures a positive seal and no dust bypass. Each layer of media has multiple fiber deniers (fiber diameter) which graduate from coarse to fine for maximum dust loading and efficiency. A latex resin dry tackifier is added on the downstream side as an added dust migration prevention. AGEIS antimicrobial treatment is also added to RLDX1 and RLDX8 panels to help prevent microbial growth.

POLYESTER PADS

Quality Seal Polyester medias are offered in an array of fiber blends, tackifiers, and binders to meet specific HVAC and Paint Filtration needs. We cut to size in pads for holding frames or rolls for "hook and roll" installations.

In our "PA" Paint Overspray collection media we blend very large fibers on the air entry side of the media with small fibers on the air exit side. This gradient density affords excellent paint loading and efficiency for long service life, minimal pressure drop and protection of the surrounding environment and equipment.

Our 2" Tackified media blends coarse fibers on the air entry side of the media with very fine fibers on the air exit side. This provides a "roughing" layer for high dust holding capacity and a "fine" layer for high efficiency. A nonmigrating tackifier is applied to the air exit side to prevent dust from shaking loose.

QUALITYSEAL

POLYESTER POCKETED FILTERS

PAINT ARRESTOR MEDIA - POLYESTER CUBES

Quality Seal Polyester Pocketed Filters offer up to five times the filter area of a flat panel filter. This equates to better efficiency and less filter change-outs. These filters are offered in four configurations with many media combinations to meet any HVAC or Paint filtration need. Heavy gauge galvanized support wires ensure stability for heavy dust or paint loading. A 1" overlap of media around these wires ensures a positive seal and no bypass. Our manufacturing and packaging process ensures that the pockets stay open and utilize all of the media. Our two pocket triangular "Q" design is unique to Quality Filters and offers the best value.

Paint Arrestor media is best used for Industrial Paint Booth applications when emissions levels need to be minimized. They can be used as a primary or secondary filter.

HEADER OR NO SUPPORT WIRE

Add one of the following letters to the end of the part number for header add-on or support wire deletion.

Ex. CF2PA242412H

H = Header added to filter. Add \$5.00 to list price.

X = No support wire on filter.

Subtract \$2.00 from list price.

* To price a non-standard cube filter, add \$5 to the list price of the next largest filter of the same pocket count.

The QSM 100 filter uses our Paint Arrestor media with a 4 ounce polyester densely needled felt backing. This filter offers exceptional efficiency but maintains a low pressure drop. The QSM 100 is well suited to Paint Overspray applications where particle emission control is critical. Use the QSM 100 as a high efficiency final stage for wet paint applications, a primary filter for powder paint, HVAC dust, grinding dust or other powdery substances.

HEADER OR NO SUPPORT WIRE

Add one of the following letters to the end of the part number for header add-on or support wire deletion.
Ex. CF2QS242412H

H = Header added to filter. Add \$5.00 to list price.

X = No support wire on filter.

Subtract \$2.00 from list price.

* To price a non-standard cube filter, add \$5 to the list price of the next largest filter of the same pocket count.

QUALITYSEAL

POLYESTER POCKETED FILTERS

1" TACKIFIED MEDIA - POLYESTER CUBES

Quality Seal Polyester Pocketed Filters offer up to five times the filter area of a flat panel filter. This equates to better efficiency and less filter change-outs. These filters are offered in four configurations with many media combinations to meet any HVAC or Paint filtration need. Heavy gauge galvanized support wires ensure stability for heavy dust or paint loading. A 1" overlap of media around these wires ensures a positive seal and no bypass. Our manufacturing and packaging process ensures that the pockets stay open and utilize all of the media. Our two pocket triangular "Q" design is unique to Quality Filters and offers the best value.

1" MERV 8 antimicrobial tackified media is best used for HVAC dust applications and Paint Booth intake pre-filters.

HEADER OR NO SUPPORT WIRE

Add one of the following letters to the end of the part number for header add-on or support wire deletion.

Ex. CF2M8242412H

H = Header added to filter. Add \$5.00 to list price.

X = No support wire on filter.

Subtract \$2.00 from list price.

* To price a non-standard cube filter, add \$5 to the list price of the next largest filter of the same pocket count.
